SUMMARY

Computer Science undergraduate with experience building full-stack applications using MERN and Django. Skilled in REST API development, database design, cloud deployment, and responsive web interfaces. Passionate about software engineering and creating scalable user-centric solutions.

Education

University of Asia Pacific, BSC in Computer Science Jan 2023 – Dec 2026

- GPA: 3.73/4.0 (Until 7th Semester)
- **Coursework:** Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Operating Systems, Computer Networks, Software Engineering, Machine Learning

Experience

Customer Experience Agent, DARAZ-Alibaba Ltd. – Dhaka, Bangladesh August 2022 – Jan 2023

- Managed high-volume customer interactions across phone, email, and chat, maintaining 95% satisfaction rate.
- Resolved complex order, payment, and delivery issues with a strong focus on first-contact resolution.
- Collaborated with cross-functional teams to improve issue resolution efficiency.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, Java, C, SQL

Frontend: React.js, Vite, Tailwind CSS, DaisyUI, HTML5, CSS3, Bootstrap

Backend: Node.js, Express.js, Django

Databases: MongoDB, MongoDB Atlas, Microsoft SQL Server

Tools & Platforms: Git, GitHub, Postman, Render, Upstash Redis, VS Code

Concepts: REST APIs, Authentication & Authorization, CRUD Operations, Responsive Design, MVC Architecture

Projects

ThinkBoard – MERN Stack Note Management Application Live Demo | GitHub

- Developed a full-stack note management platform using MongoDB, Express.js, React, and Node.js with secure RESTful API integration.
- Built a responsive React frontend using Tailwind CSS and DaisyUI for desktop and mobile devices.
- Designed and implemented RESTful CRUD APIs for note creation, retrieval, updating, and deletion.
- Integrated Upstash Redis-based rate limiting to enhance API security and prevent abuse.
- Deployed the application on Render and integrated MongoDB Atlas for persistent cloud-hosted data storage.

Zestora – Recipe Sharing Web Application Live Demo | GitHub

- Developed a full-stack Django web application enabling users to create, search, bookmark, and manage recipes.
- Integrated Google OAuth authentication and social engagement features including likes, comments, and bookmarks.
- Built advanced search and filtering functionalities to improve content discovery and user experience.
- Designed backend APIs and database structures supporting PDF export and dynamic content interactions.

TicketNao – Multi-Transport Ticket Booking Platform GitHub

- Developed a centralized ticket booking platform supporting bus, train, air, and ship reservations.
- Designed relational database schemas and backend workflows for booking management and user authentication.

- Built responsive user interfaces using Django, HTML, CSS, JavaScript, and SQL.
- Applied MVC architecture principles to improve maintainability and scalability.

Research Experience

Research Thesis: Causal Dynamic Probabilistic HNAM for Explainable Retail Demand Forecasting

- Developed an interpretable deep learning framework for retail demand forecasting using the M5 Forecasting dataset.
- Integrated causal price-effect modeling and probabilistic forecasting techniques to improve prediction reliability.
- Evaluated forecasting performance using RMSE, MAE, RMSSE, and sMAPE metrics.
- Conducted large-scale experiments using Python, PyTorch, and time-series forecasting methodologies.

AWARDS & ACHIEVEMENTS

- **Vice Chancellor's Award (4 Times)** – Awarded in Spring 2024, Fall 2024, Spring 2025, and Fall 2025 for outstanding academic performance (semester GPA ≥ 3.90).
- Maintained a perfect GPA of 4.00/4.00 in the semesters for which the award was received.
